WHAT IS THE CSCG?

We are a global network of more than 500 civil society organizations (CSOs) and youth-led organizations (YLOs) working to advance sexual, reproductive, maternal, neonatal, child and adolescent health and nutrition (SRMNAH-N) in GFF countries.

WHAT IS OUR ROLE IN DRIVING PROGRESS FOR SRMNAH-N IN GFF COUNTRIES?

- Fostering the meaningful engagement of communities and leadership of CSOs/YLOs to unlock progress for GFF goals and drive accountability for human rights and health outcomes.
- Promoting best practices for bottom-up, local-to-national community-led monitoring and feedback loops by CSOs/YLOs to identify real-world gaps in health service equity, quality and access to generate locally relevant, innovative and impactful solutions.
- Advancing donor and domestic resources mobilization and health budgets transparency and accountability to ensure that investments in health reach targeted communities and are aligned to strengthen primary health care services and universal health coverage for women, children and adolescents.
- Pushing for further inclusion of civil society and youth leaders in health policy and budget-making processes through adequate funding, technical assistance and coalition strengthening to hold country governments and other GFF stakeholders accountable.
